

Virasat hyper heritage

Tales from Karnataka, India

Description:

The **5-Day 7-Day** workshop aims to give a glance about the diversity of heritage through, marvelous temple architecture in Southern India. It would establish a comprehensive understanding of evolution of architecture, through the different era under various empire and kingdom throughout the centuries. Further to demonstrate the unity in diverse architecture form, which became the regional identity. The workshop will include exposure to heritage sites and equivalent studio hours. Participants will get a chance to unravel the layers of tangible and intangible heritage architectural styles.

Objective:

By the end of the workshop, the students will be able to...

- Develop a chronological understanding of Karnataka's architectural heritage including stylistic variations and influences.
- Identify and categorize characteristic features of architecture observed in the region.
- Perform valuation of heritage property based on tangible and intangible factors
- Develop analytical inferences for sustainable integration of heritage sites

Outcome:

- Students will compile a Hyper Heritage Video documentation of their selected heritage site, group of 3-4 members.
- Students will prepare a brief proposal document, which include analytical report on heritage value assessment followed by a graphic preamble for future development of the identified heritage zone, groups of 3-4 members.
